¹Though GAO has identified at least 24 federal HHS programs as having teen-pregnancy prevention components, expenditures could not be isolated for FY2002. A complete list of identified programs can be found at

<http://www.house.gov/burton/RSC/Abstinence2.PDF> based on GAO/HEHS-99-4 at www.gao.gov

²All funding figures are taken from appropriations bills signed into law, the federal budget, and/or are based on information provided by the relevant legislative affairs offices.

³According to the Title X office, 1/3 of funding is for teens.

⁴According to the TANF 4th Annual Report to Congress April 2002, 1.4% of TANF funds are for pregnancy prevention http://www.acf.dhhs.gov/programs/opre/ar2001/chapter02.htm#_Toc8151123 and "most pregnancy prevention efforts have focused on teenagers."

⁵GAO-02-81R Federal Funds for Reproductive Health, pg 5; Family planning is the only medical service, other than drug rehab, allowed in the SSBG, according to the Catalog of Federal Domestic Assistance 93.667: Social Services Block Grant

⁶In FY2001, states used \$1.9 million to fund maternal child health/family planning. (This chart does not include the \$2.6 million states used on sexually transmitted diseases, though it is likely some of these funds were for contraception programs)

⁷Based on FY01 federal funding for family planning "Medicaid Budget and Expenditure System;" CMS-64; GAO-02-81R

⁸Based on Medicaid's FY99 reported \$49 million for "child" family planning out of \$415 million total in family planning (Note: less than half current funding total) <http://www.cms.hhs.gov/medicaid/msis/99total.pdf> (see table 7)
